Notes	Where not supplied use original fittings	dB Killer	SCEXDBK47 - (Type PB)

A) Remove the spring between the rear silencer and centre silencer.

B) Remove the rear silencer mounting bolt.

C) Carefully remove the rear silencer.

D) Slide the Scorpion connecting pipe onto the original centre silencer outlet.

E) Slide the Scorpion silencer onto the connecting pipe, then rotate the connecting pipe to line the silencer mounting bracket up with the mounting point on the frame.

F) Loosely secure the silencer in place with the supplied mounting hardware. You will fully tighten at a later stage.

G) Attach the original spring between the centre silencer and Scorpion connecting pipe. Then fit the Scorpion springs between the spring hoops on the Scorpion silencer and link pipe.

H) Fully tighten the silencer mounting hardware.

When fitted take bike for a short ride to ensure all functions are correct. When bike & exhaust are cool enough check all nuts and bolts are still secure.
